

PRODUTTORI DI GOVONE VINO MISTICO IO SONO ROSSO NV/\$17.99

DESCRIPTION

The company PRODUTTORI DI GOVONE, founded in 1957, produces high quality wines that represent the territory and are internationally recognized. Currently, the winery has about 250 contributing members, owners and managers of 300 hectares of vineyards. They are located in the areas of Alba, Langhe, Roero, Asti and Monferrato.

The territory of Langa and Roero is one of the most generous regions in the world for the quality and variety of wine production.

It all stems from the particular geographical location.

The Roero north of the Tanaro is characterized by steep fortresses and steep rock walls, valleys and hills that create different microclimatic conditions and allow the grapes to express fine and intense aromas.

The Langhe are located in the southern part of Piedmont and the name refers to the hills arranged parallel to each other, forming deep and very narrow valleys.

The calcareous-clayey character of the Langa lands means that the red wines are full-bodied and very structured; the sandier and softer soils of Roero give the wines unique and unrepeatable aromas.

Monferrato and Asti have variable characteristics: they range from sand to silt, to clayey soils and for this reason vines with different characteristics are cultivated.

They find white grape varieties such as Cortese, red grape varieties such as Barbera d'Asti and aromatic vines such as Moscato and Brachetto.

The company PRODUTTORI DI GOVONE SAC produces 2 million litres of wine annually
